Algeria

Summary

Final year Computer Systems Engineering student with good skills in programming and network fundamentals (CCNA). Gained hands-on experience in applying machine and deep learning techniques through an Intrusion Detection System (IDS) project. Eager to strengthen my skills in AI-driven Cybersecurity by contributing in real-world projects.

Work Experience

Intern-Ericsson

Algiers,Algeria

September 2024-Present

- Acquired knowledge of 2G,3G and 4G network architectures.
- Gained exposure to troubleshooting concepts and network problem-solving practices.
- Collaborated with senior engineers on applying machine learning for network optimization through guided tasks.

Academic Projects

Intrusion Detection System (IDS)

Higher school of computer science ESI-SBA

- Train ML/DL models for network attack detection.
- Applied Swarm Intelligence (PSO & Firefly) to optimize parameters and select features.
- Develop backend APIs with Flask and performed packet sniffing using Scapy.
- Implemented React.js dashboard for logs scanning and attacks detection.

Full-Stack web Application for Management System

- Designed the application architecture and managed development using Agile Scrum.
- Integrated secure authentication with JWT and protected routes for access control.
- Developed backend APIs with Django-Rest-Framework

Skills

Programming

Python, Javascript

Network tools

Packet tracer, Putty, Tcpdump, Wireshark, Scapy

Security tools

Nmap, Metasploit, Sqlmap, Masscan

Ai tools & algorithms

Scikit learn, XGboost, LSTM, PSO, Firefly

Dev frameworks & Database

Django, Flask, Reactjs, PostgreSQL, sql

Tools & Platforms

Docker, Kali Linux, VirtualBox

Education

Final year student in computer system engineering

Higher school of computer science ESI-SBA

Expected graduation: 2026 (Master's degree & State Engineering diploma)

Certifications

- [Fundamental principles of deep learning](#) NVIDIA
- [Cisco Certified Network Associate](#) ICT Towers
